The Chevrolet 153 cu in engine was an inline-four engine designed in the early 1960s for use in the Chevy II. It is a four-cylinder variant of the Turbo-Thrift six-cylinder engine. After 1970 GM ceased production of the 153 engine in North America because of low demand (and the inline-six was thereafter made the base engine in the Nova), but the engine continued to be used in cars in other ...
