Project 22160 patrol ships are expanding their capabilities in the field of air defense. According to a source in the Russian defense industry, a decision was made to retrain the ships of the series into air defense corvettes. The decision to arm the entire series of project 22160 patrol ships was made based on experience

### Project 22160 patrol ships to be reclassified as air defense corvettes

This experience is important for us too. Ships without air defense have no future. The Polish patrol corvette of the project 621 ORP Ślężak, despite the relatively large displacement and size, has the same weak air defense as the Russian ships of the project 22160, having only the Grom MANPADS, and the main armament is represented only by artillery and machine guns.

### “Ships without air defense have no future”: Poland urges to take into ...

### First Open Letter on the WHO's Pandemic Treaty - World Council for Health

The sun's rays provide warmth and light that enhance your general feeling of well-being and stimulate blood circulation. Some UV radiation is essential to the body as it stimulates the production of vitamin D. Vitamin D has an important function in increasing calcium and phosphorus absorption from food and plays a crucial role in skeletal development, immune function and blood cell formation.

### Radiation: The known health effects of ultraviolet radiation
