User manual and reference guide version 5.65.5 CodeMirror is a code-editor component that can be embedded in Web pages. The core library provides only the editor component, no accompanying buttons, auto-completion, or other IDE functionality. It does provide a rich API on top of which such functionality can be straightforwardly implemented.

CodeMirror: User Manual

Sets focus to the container that matches the specified criteria. See [command_criteria]. left|right|up|down Sets focus to the nearest container in the given direction. parent Sets focus to the parent container of the current container. child The opposite of focus parent, sets the focus to the last focused child container. next|prev

i3 User's Guide

User commands can be defined here by "adding" them. Each user command has a name with a pattern <command id>:<display name>, e.g. user0:User Command 0. The command id has to be unique and must not contain spaces. In advanced mode, you can reference it using txs:///<command id>. The display name will be shown in the tools menu.

The widget is the atom of the user interface: it receives mouse, keyboard and other events from the window system, and paints a representation of itself on the screen. ... The Tab and Shift+Tab keys are only passed to the widget if they are not used by the focus-change mechanisms. ... The position pos is the position of the context menu event ...

QWidget Class | Qt Widgets 6.3.0

Parameters. filename. If filename is of the form "scheme://...", it is assumed to be a URL and PHP will search for a protocol handler (also known as a wrapper) for that scheme. If no wrappers for that protocol are registered, PHP will emit a notice to help you track potential problems in your script and then continue as though filename specifies a regular file.

1.2 What is Coot? Coot is a molecular graphics application. Its primary focus is crystallographic macromolecular model-building and manipulation rather than representation i.e. more like Frodo than Rasmol. Having said that, Coot can work with small molecule (SHELXL) and electron microscopy data, be used for homology modelling, make passably pretty pictures and display NMR structures.

The Coot User Manual - MRC Laboratory of Molecular Biology

Most actions that users take in the point of sale (POS) are considered operations. Operations are configured and managed in the Dynamics 365 Commerce back office. Many operations can be added to buttons in the POS button grid. Users can then select the buttons to invoke the operations and perform their function.
