Pier Andrea Saccardo (1845 - 1920) - a brief biography The information below is derived from many sources; major reference texts are listed at the foot of the page.. Born in Volpago del Montello, Treviso, in northern Italy, on 23rd April 1845, Pier Andrea Saccardo was interested in nature, and botany in particular, from an early age.

Pier Andrea Saccardo, mycologist: brief biography

Since 1940, the Index of Fungi has continued the catalogues of Saccardo, Petrak, Zahlbruckner and Lamb in listing full details of new and replacement names and recombinations of fungi and related organisms, now at all ranks. Standardised author names and full bibliographic references are provided. The systematic position of genera and ranks above is indicated, following the classification of the latest edition of CABI's Dictionary of the Fungi.

Toshiba Dp5022 Sd User Guide

A fungus (plural: fungi or funguses) is any member of the group of eukaryotic organisms that includes microorganisms such as yeasts and molds, as well as the more familiar mushrooms. These organisms are classified as a kingdom, which is separate from the other eukaryotic life kingdoms of plants and animals.. A characteristic that places fungi in a different kingdom from plants, bacteria, and ...
