How it works: The evaluator has a child read aloud single real words and pseudowords (fake words). Fake words look like real ones but they have no meaning, such as hiff or migheron. Having to decode fake words tests a child's ability to apply rules for matching units of sound to their written symbols in order to sound out words.

Tests for Dyslexia | Understood

Password requirements: 6 to 30 characters long; ASCII characters only (characters found on a standard US keyboard); must contain at least 4 different symbols;
