Given two continuous random variables, x and y , along with their joint probability density, $P(x,y)$, we wish to find the probability density of a new random variable, s , that is some function of the original random variables, $s=f(x,y)$. The formal solution can be written in terms of a Dirac delta function.

Mcquarrie Statistical Mechanics Solutions Chapter 1

Denote the number of molecules in the left half of the box by n and the number in the right half by n' . Of course $n + n' = N$, (1) the total number of molecules in the box. If N is large, we would ordinarily find that $n \sim n'$, i.e., that roughly half of the molecules are in each half of the box.
