A hydraulic ram, or hydram, is a cyclic water pump powered by hydropower.It takes in water at one "hydraulic head" (pressure) and flow rate, and outputs water at a higher hydraulic head and lower flow rate.The device uses the water hammer effect to develop pressure that allows a portion of the input water that powers the pump to be lifted to a point higher than where the water originally started.

Hydraulic ram - Wikipedia

History of salt workings in Cheshire Northwich. A settlement, Condate, was built during Roman times at the current location of Northwich.It is believed that the Romans built this settlement due to the strategic river crossing of the Weaver and the presence of the brine springs. The Romans used lead salt pans to extract the salt from the brine.

1. History of the Correspondence Theory. The correspondence theory is often traced back to Aristotle's well-known definition of truth (Metaphysics 1011b25): "To say of what is that it is not, or of what is not that it is, is false, while to say of what is that it is, and of what is not that it is not, is true"—but virtually identical formulations can be found in Plato (Cratylus 385b2 ...
