Logical-mathematical learners would find a statistical study more appealing than reading fictional literature or keeping a journal. Your child may also like to create graphs, charts, and timelines, as well as analyze data. They could be drawn to games like chess or science kits that encourage experimentation.

Logical-Mathematical Intelligence: Logical Learning Styles

A generation refers to all of the people born and living at about the same time, regarded collectively. It can also be described as, "the average period, generally considered to be about 20–30 years, during which children are born and grow up, become adults, and begin to have children." [citation needed] In kinship terminology, it is a structural term designating the parent-child ...

Background. Although related to the more general problem of the origin of language, the evolution of distinctively human speech capacities has become a distinct and in many ways separate area of scientific research. The topic is a separate one because language is not necessarily spoken: it can equally be written or signed. Speech is in this sense optional, although it is the default modality ...
